</tbody>
</table>

The timber casing has:
- Case gable (on the hinge side) 32 x 115 mm
- Other case sides 24 x 115 mm

Trap door:

- Frame timber, 30 x 45 mm.
- Board 4,5 mm on the bottom and 3,2 mm on the top.
- Insulation 30 mm polystyrene.
- Insulation factor 0.82 W/ m²C°

The trap door is spring balanced with one spring on each side of the ladder.

Surface treatment:

- The bottom side of the trap door is painted with white basic.

Fire rate:

- Unrated

Ladder description:

- 3-parts fold up timber ladder is lying on the trap door and fitted within the frames of the casing. Each ladder section has 4 treads. The ladder is guaranteed for 150 kg.
- Ladder width including the sides 400 mm
- tread 26 x 87 mm
- ladder side 20 x 90 mm
- distance between the treads 242 mm

Height of the fold up ladder:
- From the bottom of the casing (including the trap door) 310 mm
- Ladder only 290 mm

Together with the extension the height of the fold up ladder is:
- From the bottom of the casing (including the trap door) 990 mm
- Ladder only 970 mm

Note:

It is possible to order only the ladder to the existing trap door. In order to mount a 3-parts ladder on the existing trap door the inner size of the trap door should be at least 490 x 1050 mm. The hinges must be placed on the shorter side of the trap door.
The loft ladder can be even ordered with the non-standard trap door size within the limits: width 540 – 900 mm; length 1070 – 1400 mm.

**Locking:**

A catch which opens with the key/handle of round metal
Diameter 9 mm, length 800 mm. Measurement: square 7-8 mm.

**Ceiling height:**

Standard ceiling height is 2700 mm
If the ceiling is lower, the ladder shall be shortened according to the assembly instructions, while for the higher ceilings an extension can be used in order to reach maximum 3200 mm

**Sealing:**

EPDM rubber seal is mounted between the casing and the trap door.

**Others:**

Ladders placement on the floor at the different ceiling heights (in mm):
